

ABOUT US

EXPERIENCE AND INNOVATION

When it comes to maintaining your equipment, especially the steel on your skates, it is an important responsibility that should not be left to just anyone. Sure the age of computer controlled equipment and technology has made this maintenance easier and more consistent, but I will never replace the knowledge gained over 22 years and counting. Sharpening, riveting, repair, and custom work in the hockey world is a lost art these days... But, Corsairs Hockey Equipment Management takes those time honored methods and brings them into today's age offering the best service possible to keep you playing at your best!

A UNIQUE MOBILE APPROACH

Making a stop at the local pro shop either before or after your ice time to get a sharpening or service is common practice. But what if you're running late and can't get your skates sharpened before a game! What if there is a line ahead of you? Or let's say practice just got done and you don't want to wait in line with everyone else. Do you think you're the only one who has ever ran into that situation? This is an age old problem that we've come to accept. But not anymore! Corsairs Hockey Equipment Management can conveniently come to you while offering the same services as many shops with the experience that is unmatched!

BECAUSE WE PLAY HOCKEY

Some weeks we wonder where the time went... "oh, right. We were at the rink." The kids skate. The wife skates. I skate. We spend hours on the ice and thousands of miles have been put on our vehicles to play the game. Men's leagues, learn to skate, house leagues, travel leagues, tournament teams, Ice, Inline, I have done it! We are a hockey family! Our non-hockey friends and families might not get it, but that's okay. Corsairs Hockey Equipment Management was built on a foundation that understands the sport and the people that are involved with it!

ICE SKATE SHARPENING

Corsairs Hockey proudly uses both manual honing/de-burring techniques and Sparx sharpening equipment. Automated technology takes the guesswork out of creating a consistent, even, and precise edge without removing excessive steel. Best of all, both manual and automated processes allow us to be mobile! while offering a professional grade sharpening!

COMMON HOLLOWS OFFERED ARE:

3/8", 7/16", 1/2", 5/8", and 1/2" FIRE

shallower goalie and figure skate hollows may be offered in the future

INLINE BEARING CLEANING

Your wheels affect the amount of grip you get on the floor. Your bearings affect how fast you go! Sure you could just buy new, but a good set can be expensive. Clean them instead!

Cleaning them is the equivalent to sharpening your ice skates. Dirt and grime will get into your bearings causing excess friction. And lubrication doesn't last forever either! It will break down over time causing excess heat and eventually damage your bearings.

Corsairs Hockey uses cleaning methods that are environmentally friendly and specially designed to be safe on all metals. All of our lubricants are 100% synthetic and will not attract dirt keeping them turning quiet, smooth, and fast.

For your convenience, most services can be performed mobile, on site, or at our shop!

- **Does your helmet need some TLC?**
- **Need your stick sized and cut?**
- **Does your child's helmet not fit properly**

These and many other services offered... Just ask!

MANAGEMENT PRICING:

▪ **Call for Pricing**

Individual items need to be inspected and priced prior to servicing.

Upon inspection, a price for repairs or adjustments will be presented and agreed to by customer before commencing work.

SERVICES

Corsairs Hockey Equipment Management Is innovating the hockey industry!

There is not a hockey shop at every corner!

Lets face it, if you play hockey or if you have kids that play hockey, at some point you may feel like you live at the rink!

Why not make equipment management convenient. Why not bring professional services, knowledge, and quality directly to the people who make hockey the great sport that it is!

MOBILE SERVICES PRICING:

▪ **\$12.00 Convenience Fee***

Within standard service area. Offered on most services.

**additional charges for service charges for individual appointments outside of the service area*
